Supplement by FS Miller and Officer Norris, Crime Lab Unit, 10/18/04  
JCN: 04-117071

On 10/18/04 at approximately 0830 hours, Sgt. Mattson, Homicide, requested various items of clothing in his possession be examined for possible blood stains. The clothing consisted of one grey-black "Ecko" brand reversible jacket, one navy blue zip-up hooded sweatshirt, and one white head covering.

Norris and Miller examined the items under a laser. One possible area of blood like substance (BLS) was located directly below the left front pocket on the grey side of the jacket. This area tested positive with a Hemastix presumptive blood test. Norris swabbed the area and collected two samples of the possible BLS.

The two swab samples and the Hemastix were property inventoried by Miller.
