

The location is off TX HWY service road 71. It is somewhat recessed from the road and immediately after a curve in the road so it is possible to pass it by accident. There is a parking lot behind the building but due to the cameras on the building I do not advise using it. I took the pictures at approximately 12-12:30 AM on Tuesday night. The building was very well lit and still seemed decently busy. Jason told me that they close at 2 AM so I expect any remaining staff will have left by 3:30 AM at the very latest. That said it is possible the lights are never turned off.

There looked to be cameras in 3 locations on the building. 2 right above the mural, I think there was 1 at the left of the building entrance and 1 near the back of the lot. The THT next door did not seem to have any external cameras but it was not as well lit so I might simply have missed them.

A view of the building from the Fort View RD.

I also drove along Clawson LN and Morgan LN behind the bar I saw that there were some sections and I believe that Morgan LN may be an acceptable place to park. From my memory there were some sections of the LN that were not well lit so that even if there were home cameras they may be less effective.
