

-----  
SUPPLEMENT OF K. REYNOLDS, F.S. - CRIME LAB/FIREARMS - 6/29/04

At the request of Sgt. Mattson, I removed the following property from the MPD Property & Evidence Unit:

From P# 14552:

Item - 1: One (1) fired bullet, slight damage, approximate weight 10.0709 grams or 155.420 grains, jacketed, truncated/conical nose, three (3) cannelure's, lead base, five lands and grooves with a right-hand twist (5R), approximate diameter .357

Item - 1 is most consistent with caliber .357 Magnum / .38 Special

Item - 2: One (1) fired bullet, slight damage, approximate weight 8.3818 grams or 129.350 grains, copper jacketed, hollow point, one (1) cannelure, closed base, five lands and grooves with a right-hand twist (5R), approximate diameter .357

Item - 2 is most consistent with caliber .357 Magnum / .38 Special

Comparison of Item - 1 with Item - 2 was completed with inconclusive results. When compared, Item - 1 and Item - 2 failed to reveal an identification, however, it cannot be excluded that Item - 1 and Item - 2 were fired in the same gun.

I hereby certify this is the result of a true and accurate examination. These results were verified by FS Hummel.
