SUPPLEMENT OF SGT. MATTSON  
CCN 04-117071 ON 8-31-04

On 8-19-04, I was phoned my Forensic Scientist Kurt Moline of the BCA Firearms section. He informed me that the BCA would not be doing a test for gunshot residue on the clothing submitted from Marvin Haynes. He advised me he would be sending the clothing back to MPD.

I consulted with County Attorney Furnstahl who requested the clothing be checked for blood or blood spatter by the BCA lab and then sent on to a lab (that performs gunshot residue tests). The clothing was already being returned to the MPD. When I received the clothing, I again hand carried it to the BCA on 8-31-04 without opening the container and delivered it to Forensic Evidence Specialist Lavonne Beck at the Intake section. I requested it be sent to the DNA section and be evaluated for blood/splatter.

Results are pending.
